Times Microwave Systems Announces Price Changes for *LMR*[®] Products

Due to continued increases in material costs for metals and petrochemicals used in the manufacturing of Times *LMR*[®] cables, connectors and accessories and higher related costs including freight, prices for most items will increase effective August 1, 2008.

LMR[®] cables are flexible, non-kinking low loss RF transmission line cables that utilize easy-to-install connectors and are suitable for use as antenna feeders, system jumpers and interconnects. Times Microwave Systems is the industry leader in the design and manufacture of high performance coaxial cables and RF transmission line components.

About Times Microwave Systems

Times Microwave Systems has more than 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. Times specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies.
